WIRELESS SURGICAL MONITORING

DVM Solutions

PC-VetGard

San Antonio, TX- DVM Solutions is excited to introduce the first and only Bluetooth wireless surgical monitor. The PC-VetGard is easily the best bang for your buck surgical monitor in the veterinary industry. You can now wirelessly monitor ECG, Heart Rate, SpO2, Respiration, and both core and rectal temperatures of up to 5 patients simultaneously from *your computer*. With the limited time introductory price that is now available there is no substitute for the PC-VetGard.

The PC-VetGard comes complete with everything you need to make your computer the most high-tech surgical monitor around. The PC-VetGard is ideal in surgery, for long-term critical care monitoring, and quick Lead-II ECG screening in the exam room. The PC-VetGard comes with everything you need to make this the most profitable piece of equipment in your practice.

In addition you will receive the all-new PC-VetGard Reviewer software package that enables automatic data documentation and storage of vitals in five-minute increments, there is no longer a need for manual recording of vital signs for liability protection. The software also provides a quick and easy method for measuring QRS complexes and emailing them for consultation. Easily compare your patients to the normal ranges of dogs and cats as defined by Dr. Larry Tilley so you don't have to pay a consultant to view normal patients.

Find out how an investment of under \$5,000 can make your clinic one of the most efficient and profitable practices around. Mention this ad to receive \$500 off our retail price.
